#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Designation: E 165 - 02

Standard Test Method for Liquid Penetrant Examination¹

This standard is issued under the fixed designation E 165; the number immediately following the designation indicates the year of original approval or the year of revision; a number in parentheses indicates the year of subsequent revision or amendment.

1. Scope
- 1.1 This test method² governs procedures for penetrant examination of materials. This is a nondestructive testing method for detecting discontinuities that are open to the surface such as cracks, seams, holes, cold chills, inclusions, foreign matter, or lack of fusion and are applicable to pre-process, final, and maintenance examination. This can be effectively used in the examination of nonporous, metallic materials, both ferrous and nonferrous, and of nonmetallic materials such as glass or fully densified ceramics, certain thermoplastic plastics, and glass.
- 1.2 This test method also provides a reference:
 - 1.2.1 for which a liquid penetrant examination process recommended or required by individual organizations can be reviewed to determine its applicability and consistency;
 - 1.2.2 for use in the preparation of process specifications dealing with the liquid penetrant examination of material and parts. Agreement by the user and the supplier regarding specific techniques is strongly recommended;
 - 1.2.3 for use in the organization of the facilities and personnel concerned with the liquid penetrant examination;
 - 1.3. This test method does not indicate or suggest criteria for evaluation of the indications observed. It should be pointed out, however, that after indications have been produced, they must be interpreted and classified and then evaluated. For this purpose they must be a separate code or specification or a specific agreement as to the type, size, location, and direction of indications considered acceptable, and these considered unacceptable;
 - 1.4. The values stated in inch-pound units are to be regarded as the standard. SI units are provided for information only;
 - 1.5. This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.
2. Referenced Documents
- 2.1 ASTM Standards:
 - D 159 Test Method for Sulfur in Petroleum Products (Gravimetric Bomb Method)
 - D 395 Test Method for Sulfur in Water
 - D 895 Test Method for Chlorine in New and Used Petroleum Products (Bromine Method)
 - D 1115 Specification for Reagent Water
 - D 1512 Test Method for Sulfur in Petroleum Products (High Temperature Method)
 - D 4127 Test Method for Arsenic in Water by Chemically Separated Barium Chromate
 - E 433 Reference Photographs for Liquid Penetrant Inspection
 - E 543 Practice for Evaluating Agencies that Perform Nondestructive Testing
 - E 1208 Test Method for Fluorescence Liquid Penetrant Examination Using the Lipophilic Post Emulsification Process
 - E 1209 Test Method for Fluorescence Liquid Penetrant Examination Using the Water-Washable Process
 - E 1210 Test Method for Fluorescence Liquid Penetrant Examination Using the Hydrophilic Post Emulsification Process
 - E 1211 Test Method for Fluorescence Liquid Penetrant Examination Using the Solvent-Removable Process
 - E 1164 Terminology for Nondestructive Examinations
 - E 1165 Test Method for Visible Penetrant Examination Using the Water-Washable Process
- 2.2 ANSI Document:
 - Recommended Practice, ANSI Z39.14 for Nondestructive Testing Personnel Qualification and Certification
- ANSI/ASNT CP 189 Standard for Qualification and Certification of Nondestructive Testing Personnel
