

Relationships In Ecosystems Worksheet Answers by Princeton University Press

Relationships In Ecosystems Worksheet Answers

Ecological Relationship (What symbiotic relationships are seen in ecosystem) Biology packet. The one we choose was the Dog & Flea. The reason why we choose Parasitism for it was because parasitism means one organism benefits and the other is harmed. The Dog gets infections & rashes from the Flea, while the Flea gets what it needs, so in the end, the Dog is getting harmed in the process.

relationship in ecosystems cloze answer sheet - Bing

Symbiosis is an ecological relationship between two species that live in close proximity to each other. Organisms in symbiotic relationships have evolved to exploit a unique niche that another organism provides. These relationships are based on the advantages that can be gained by finding and using a previously unexploited niche.
